

2019-05-14 Infra WG Meeting

Date

14 May 2019

Attendees

- [VM Brasseur](#)
- [Daniel Pono Takamori](#)
- [Rudra Dubey](#)
- Alex Levine
- [Casey Cain](#)
- Andrey Pavlov
- [Sukhdev Kapur](#)

Agenda

- Review action items from [2019-05-07 Infra WG Meeting notes](#)
- Review [Infra Jira tickets](#)
- Updates from Progmatic
- Migration of tf/docs to Gerrit

Minutes

- Action items
 - Sukhdev still working on committer lists
 - Pono still needs to write up that doc about squashed repos
- Ticket review
 - <https://jira.tungsten.io/browse/TFB-1390> (disable PRs)
 - Not a feature of GH
 - May need to set up a probot for this
 - <https://jira.tungsten.io/browse/TFB-1391>
 - Possible, but not at org level
 - Not a problem, Pono can disable issues for all repos
 - <https://jira.tungsten.io/browse/TFB-1403>
 - Need an initial dump of CI doc, can then iterate on it
 - Progmatic will work on gathering their info so it can be converted to a doc
- Timing question for Vexxhost
 - Vexxhost is slooooooooooow: build RPMs + containers takes 2 hours
 - Progmatic has several other data points to compare to (Juniper, AWS)
 - VH config is underperforming in comparison
 - Comparison table: <https://docs.google.com/spreadsheets/d/1zCo8ZlpWZ1bqtSFvcG8WDKjNIXmtKZEKQJzsdtamEas/edit#gid=0>
 - Swap is switched off, so that's not it
 - Bottleneck...?
 - Disk?
 - Node is over-committed?
 - Slower CPU?
 - All of the above?
 - AWS is much faster, takes much less time less cost
 - Pono: How are unit tests doing, perf wise?
 - AP: unit tests are totally borked right now
 - May be some optimisation for buildrpm will help
 - Pono: Links to Zuul jobs? To get logs for more information?
 - AP will send links later
- Windows CI
 - kvm kernel version?
 - Possible to run Windows CI there?
 - AP sent email about this to Pono
 - Pono knows of no other projects that are doing Windows on Vexxhost
- tf/docs migration to Gerrit
 - WIP
 - Pono will work on this week
- CLA
 - Pono enabled CLA checks for Gerrit yesterday (gerrit.tungsten.io)
 - Writing docs for this

Action items

- Daniel Pono Takamori check on how to disable PRs
- Daniel Pono Takamori investigate notifications for JIRA
- Daniel Pono Takamori vexxhost slow disks vs AWS/ internal juniper openstack
- Daniel Pono Takamori Check for Windows licenses for Vexxhost
- Daniel Pono Takamori Docs about CLA process to tf/docs
- VM Brasseur Move initial 5.0.1 Contrail docs export to tf/docs before Pono transitions that repo to Gerrit
- Andrey: Post more stats about the AWS instance
- Alex/Andrey: Collect info on CI setup/workflow for documentation
- Andrey: Send links to Vexxhost Zuul builds
