

# 2019-04-10 Docs WG Meeting notes

## Date

10 Apr 2019

## Attendees

- [VM Brasseur](#), Juniper
- [Will Stevens](#), CloudOps
- [Kieran Milne](#), Juniper
- [Anda Nicolae](#), Lenovo

## Agenda

- Review action items from [2019-04-03 Docs WG Meeting notes](#)
- Review notes from [2019-04-03 Docs WG Meeting notes](#)
- PTL question update
- Issue tracking
  - see [this email](#)
- If-docs
  - see [this email](#)
- Next steps...?

## Minutes

- Action items
  - All done
- Notes from last week
  - List of docs from all over the place (thank you, [Kieran Milne](#))
  - KM's suggestions for moving forward
    - Community-created/-maintained
    - Leverage Conrail docs
    - Use fully Juniper docs
  - VM: Start with Conrail docs, move to TF repo
    - WS: May not need to import history of Conrail docs
    - KM: Tooling for the Conrail docs conversion is at least a year old
      - [Previous conversion](#)
    - KM: Also will need to rebrand the docs to TF and re-link the topic pages
      - For instance, [these links are broken](#)
    - KM: Over time, Juniper content will be more than just TF
      - VM: TF docs will be source of truth, won't need another dump of docs; Juniper will start contributing to TF docs instead
    - KM: May need more resources to make stuff happen on Juniper side
      - VM: May be able to get an assist from Pragmatic if needed?
  - PTL update
    - No word from the TSC yet
  - Issue tracking
    - How did we used to do that? (no one has prior experience w/docs bugs)
    - Should get pono's input
    - WS: On another project, users don't notice the Jira and instead use GitHub since that's what they see
    - KM w/a summary of how the Juniper team is using Jira for new features & doc bugs
      - Jira for new features (story isn't complete until docs are complete)
      - GNATS for doc bugs
  - If-docs
    - Other projects use Read The Docs, should we?
    - Folks are +1 to assuming we'll use Read The Docs
    - pono may have more info on this
  - Next steps...?
    - VMB & KM have conversations w/in Juniper to start the conversion process
    - WS will have a look at <https://tungstenfabric.github.io/website/> & draft how to improve it

## Action items

- ✓ VM Brasseur Start a "what even is a PTL?" thread on tsc@ if it doesn't get covered in the TSC call tomorrow
  - ✓ VM Brasseur Invite pono to next week's meeting to talk about how to organise the issue tracking and intro to Read The Docs
  - ✓ VM Brasseur Add docs requirement for closing blueprint to the backlogged action items
-

Will Stevens will have a look at <https://tungstenfabric.github.io/website/> & draft how to improve it (won't be done by next week)
