2019-01-25 TF Marketing-WG Meeting Notes

Attendees

- Robert Cathey (Juniper/Cathey.co)
- VMB (Juniper)
- James Kelly (Juniper)
- Jennifer Fowler (Juniper/Cathey.co)
- Chaitanya Kadiyala (Juniper)
- Jill Lovato (LF)
- Maddison Long (CloudOps)

Agenda

- Meetups
- Follow up from last week
  - Demo in LFN booth at ONS (April 3-5, San Jose) (mailing list thread) What, if anything, is Juniper planning to do, and what is TF planning to do?
  - Meetup at ONS 2019? (mailing list thread) Discussed in the CC meeting today (meeting minutes). Hands-on workshop for those who are "TF curious" or "SDN curious"
  - Status of podcasts taped at KubeCon?
  - CloudOps blog forthcoming
  - Dev Summit at KubeCon EU (May 20-23, Barcelona)
- Next major release? RLB not ready to talk about this until the release train is separated from Juniper. Q2 target.
- Any new CFPs since last week?
- Any activity on moving TF meetups to LFN Meetup Pro?

Minutes

- Update from Cathey.co
  - Meetup.com got cranky; working through it
    - Jennifer will forward email to Chaitanya (who will work with JNPR IT) about getting stuff moved to LFN Meetup Pro account
  - Opportunities to present at local events
    - Jennifer pinged Michael Henkel
    - Jennifer will send requests to the community as well
- Take opencontrail.org down and change DNS to point to tungsten.io. Chaitanya will take this w JNPR IT folks
- Demo proposal for LFN booth at ONS
  - Maddison interested in building off demo from Amsterdam event; will submit that to Brandon
- YouTube
  - Video content is slim at best right now
  - Also, the GUI logo is still OpenContrail, not TF
    - Work was being done on this by Progmatic
    - Slowed (stopped?) by Juniper-reliant build & release process
- LF events
  - TF will submit a demo (see above)
  - JL: ONS isn't doing official collocated events this year
    - Instead submit to specific tracks; have added more timeslots to accommodate that
  - JL: KubeCon EU
    - FD.io will be doing something (or interested in it so far)
  - JK: Can get room space in Juniper for some things, but generally won't have a lot of Juniper resources this year
    - VMB: Sounds like we need more community help
    - JL recommends getting more tuned in with the LFN MAC

Action items

- VMB will follow up with Alex about the GUI logo
