

# 2019-05-09 Meeting notes

## Date

09 May 2019

## Attendees

- VM (Vicky) Brasseur (she/her)
- Will Stevens
- Syed Ahmed
- Casey Cain
- Daniel Pono Takamori
- Edward Ting
- Phil Robb
- Joseph Gasparakis
- Daniel Pono Takamori
- Jim St. Leger
- Ian Rae
- Prabhjot Singh Sethi
- Randy Bias

## Agenda

- Start the Recording
- [Antitrust Policy](#)
- Agenda Bashing (Roll Call, Action Items (5 minutes)
- Update from Docs team (quick) ([VM \(Vicky\) Brasseur \(she/her\)](#))
- Infra update (quick) ([Daniel Pono Takamori](#))
- TC call? or expand TSC call to review blueprints?
- 5.1 release?
- CLA Update
- KubeCon EU? Who will be there?
- GUI maintenance (see [this dev@ thread](#))
- Beijing-Network & Compute Developers Conference (NCDC) ==> 100 to 150 audiences room

## Minutes

- Action items
  - Budget for swag?
    - LFN swag store
    - Juniper can kick in but won't be covering it all
    - Darien is asking Redapt to kick in
    - Ian: CloudOps can kick in (check with Maddison)
    - JSL: What is this money for...?
      - To fund inventory in the store

- Can then figure out what to do with the inventory
  - JSL: Is this store even well trafficked?
    - ccain: Not too much traffic, correct
    - Purpose for developer outreach; hand out codes for free swag to recognize people
  - Docker manifest: push this ([Will Stevens](#))
  - DevStack: push this ([Will Stevens](#))
  - Intel show up to MWG: done
  - Blueprint process: pushed out
    - Depends on migration plan
    - Send updated ARB list to Brandon: done
    - tsc@ thread about core committers/PTLs: pushed out
      - Depends on migration plan
      - Also tied to the ARB discussion
      - Waiting to have concrete data before starting the thread
- Docs update
  - Working with Juniper to get a Contrail docs dump
  - Moving tf/docs to Gerrit
- Infra update
  - Zuul getting set up
  - Working on moving tf/docs
- TC Call?
  - Need this forum again to review blueprints
  - Expand this call? Have a separate call?
  - VMB argues it's a different group, plus easier to find a 30/60 minute slot than a 90 minute slot
- 5.1
  - Scheduled for Monday, if everything goes as planned
  - Delay has been to ensure quality: zero P0/P1/P2 bugs
  - [Sukhdev Kapur](#) has updated API spec for 5.1 he'll socialise after the release goes out
  - [Edward Ting](#) 5.1 will be pushed to the community...
    - Are there docs about how to build this?
    - SK: Will be tagged as soon as it's released. Can build then
  - [Prabhjot Singh Sethi](#) There's no branch for this. Use the tag or...?
    - SK: Will confirm that there'll be a tag. Use this.
  - RLB: Hasn't been well-organised historically
    - Will need to clean up this process once we're doing the build
    - In the meantime, should at least work w/Juniper to document the process so people can build from source
- CLA Update
  - Ready for consumption, can turn on any time
  - Does NOT work on review.contrail.org, because r.c.o isn't in the LF domain
  - Do it Do it Do it Do it please
- KubeCon EU: Who's going?
  - VMB, Sukhdev, some of the Progmatic team, Codilime folks
- GUI maintenance
  - Significant number of serious security vulnerabilities in the Node.js that we're using
    - Using a massively out of date Node.js version
  - Heavy lift to update this Node
  - Juniper has their own GUI, so not maintaining the community version
  - Lenovo had offered to help in the past; need that now; are they able? Anyone else, too?
  - At least develop a roadmap of what it would take to update Node in this (rough level of effort)
  - [Edward Ting](#) Made some progress (need to confirm) on this
    - Submitted some fixes, still under Gerrit review
- NCDC
  - Discussed last week
  - Asking for a workshop (100-150 attendees)
    - No cost to us
  - RLB: Did workshop at KubeCon Shanghai & another event at Nanjing
  - NCDC asking us to confirm the preferred time slot
    - Can reply back to them after we reach out to the teams
  - ccain isn't sure how much value there'll be here because of the late notice.
    - ET: They expect ~1K attendees
  - SK: What do you have in mind, ET?
    - Presentations can be A-OK
    - But really it's up to the community to decide
    - SK's Akraiyo+TF would be very, very interesting for this event

## Action items

- Casey Cain Send \$1K invoice to Jim St. Leger for TF swag
- VM (Vicky) Brasseur (she/her) Add the ARB question to next week's TSC call agenda
- Casey Cain Send a Doodle to determine the time of the TC call
- Darien Hirotsu Drive a new blog posting for 5.1 release, which is focused on code quality (free of known bugs)
- Sukhdev Kapur Will send new 5.1 API stuff to the docs@ mailing list
- Sukhdev Kapur Will confirm with Abhay that the 5.1 release will be tagged
- Sukhdev Kapur Will get build documentation from Abhay or someone w/in Juniper

- Casey Cain Turn on the CLA stuff for gerrit.tungsten.io
- Casey Cain Add to next TWS agenda: Review what Lenovo has contributed (the Gerrit tickets)
- Edward Ting Collect list of Gerrit patches they've submitted & share w/TSC
- Randy Bias Check in w/team who ran the workshop in Nanjing to see whether they can help with NCDC
- Edward Ting Send draft NCDC program proposal to the MWG
