

# 2019-05-29 Docs Project Meeting

## Date

29 May 2019

## Attendees

- [VM \(Vicky\) Brasseur \(she/her\)](#)
- [Tatsuya Naganawa](#)
- [Daniel Pono Takamori](#)
- [Kieran Milne](#)
- [Will Stevens](#)

## Agenda

- Action items from [2019-05-22 Docs Project Meeting](#)
- Coding style guide will be incoming from Juniper
- Confirm initial list of Committers
- What to do about [contrail-docs](#)?
- Consider moving the meeting?

## Minutes

- omg it's 1AM for Tatsuya-san!
- Action Items
  - Pono: link/ write docs on how to add members to voting groups (for new Gerrit)
    - 2 systems, one manual & one automated
    - Will do manual for now
    - Pono will write that up
    - Where to put this? Wiki or repo?
      - Put in wiki for now until we get the repo cleaned up, then move to repo later
- vicky: while at Juniper got a coding style guide that can be ported into the community
  - codify it into gerrit/ workflow?
  - will: linter or more style guide/ best practices
  - vicky: if no linter, there should be one eventually
- Initial list of Docs Committers
  - From the [mailing list](#):
    - Kieran (for now; will have a replacement soon-ish)
    - Will
    - Darien
    - Pono
    - Vicky
  - Folks are +1 on the list
  - swill: Possible to have only one person review then merge...?
    - Yeah, but can change whatever we want
    - Right now disallow someone reviewing their own stuff
    - Also, non-committers can vote
  - vmb: Problem for OpenStack: requirement to get reviews to merge means patches can languish
    - TSC will need to keep an eye on this
- What to do about [contrail-docs](#)?
  - swill confirms that the docs build, images show
    - Release notes have a conf.py file, but getting started guide doesn't, copied it over & that worked fine; easy fix to send
    - Good starting point
  - vmb: De-Contrailization? A sticky problem.
    - Can't just do a dumb find/replace
    - We should assume that no code renaming will happen
      - For instance, [contrail-controller](#) won't be renamed
      - ...buuuuut, that's referred to as [Contrail Controller](#) in the docs. What do we do about that?
      - Plus we don't know what these things will be called yet in the TF docs (TF? Tungsten? Tungsten Fabric?)
  - Going to be a ton of manual work regardless
    - Parcel it out across the group, each person work on pieces
    - Use a wiki page to track standards for changing things
  - VMB move the repo to TF GH, then we'll put this on hold for a couple weeks so we can have some time to take care of some other stuff.
    - Start with the [Getting Started Guide \(GSG\)](#)
    - swill: Start from top to bottom
    - vmb: Start from bottom to top
- Moving the meeting?
  - OK with moving it to the other end of the day

- VMB will send out a Doodle

## Action items

- ☑ Daniel Pono Takamori Still working on the adding members to voting groups
- ☑ VM (Vicky) Brasseur (she/her) Create a backlogged action item list and add "move stuff from wiki to repo" to it
- ☑ VM (Vicky) Brasseur (she/her) Open ticket to create voting group for tf/docs
- ☑ VM (Vicky) Brasseur (she/her) Move the contrail-docs repo into TF GitHub namespace (transfer ownership)
- ☑ VM (Vicky) Brasseur (she/her) Whip up a wiki page for Contrail TF docs project
- ☑ Will Stevens Add the conf.py to the GSG
- ☑ VM (Vicky) Brasseur (she/her) Send out a Doodle for moving the meeting (incl current time)
