

2019-07-16 Infra WG Meeting notes

Date

15 Jul 2019

Attendees

- Daniel Pono Takamori
- Casey Cain
- @alex
- Sukhdev Kapur

Agenda

- Review Action items from [2019-07-09 Infra WG Meeting notes](#)
- Review Jira tickets: <https://jira.tungsten.io/browse/TFB-1391?jql=component%20%3D%20Infrastructure>
- Prabhjot Singh Sethi cannot attend but wants feedback on <https://github.com/tungstenfabric/tungsten-resource-test/pull/1/commits/50e46cbf579de6c12f4b700149b176c72efe7e31>

Minutes

- **Review**
 - Daniel Pono Takamori Hasn't heard back from Carlo, will ping again
 - Daniel Pono Takamori Still needs to email lists about deleting old repos on gerrit.tf
 - Thanks to Alex: [TF CI Design and Improvements](#)
- **Jira review**
 - No new tickets
 - might want to adjust/ make a new component since non-Infra team work is getting tagged (ie, bugs/ feature requests for TF are getting tagged)
- **ATT tests PR**
 - Alex: unsure if we should accept PR
 - openstack tempest, docs tests
 - these tests don't really fit into the current suite of tests
 - overlap with current tests
 - sukhdev: why are they so different
 - Alex: uses different abstractions than current test suite
 - uses heat instead of python
 - expects heat to be slower than python and python is already too slow (re: CI doc where tests are taking so long)
 - maybe after we improve test performance we can take another look
 - Sukhdev: AT&T is running the tests currently
 - Paul Carver used to run them
 - run them in addition to current tests
 - Alex: possible to switch test suite out
 - but need to have a longer discussion about the suites
 - Sukhdev: AT&T has spoken a lot about how they run more tests and how they want to get the community involved
 - Alex: they probably run these manually
 - subset of total tests (14/100-something)
 - currently running 100-something tests
 - possible there is non-overlapping coverage but need to explore it
 - Sukhdev: need to talk with AT&T reps about how we can work with them
 - Alex: not to say we are not going to take it, but that we are still finalizing the Zuul setup
 - so we cannot integrate new design choices until there's a more finishing design
 - Sukhdev: can you respond to the PR so they are kept in the loop
 - been sitting around since 2018
 - bring up on TSC call when AT&T is around
- **Pono is working on gating gerrit for requiring Ticket IDs**

Action items

- ☑ @alex levine Respond on Github to the PR
