

2019-08-01 TSC Meeting notes

Date

01 Aug 2019

Attendees

- VM (Vicky) Brasseur (she/her) (traveling; attendance tbd)
- Randy Bias
- Edward Ting
- Jim St. Leger
- Darien Hirotsu
- Casey Cain
- Valentin Sinitsyn
- Prabhjot Singh Sethi
- bjskerry
- Sukhdev Kapur
- Daniel Pono Takamori
- Rudra Dubey
- @alevine

Agenda

- Start the Recording
- [Antitrust Policy](#)
- Agenda Bashing (Roll Call, Action Items (5 minutes))
- General Topics
 - Community SLA feedback needed (see [mailing list thread](#))
 - Can we speed up the review for <https://review.opencontrail.org/c/Juniper/contrail-controller/+52414> (it's still within Community SLA though)?
 - Repo move update
 - Juniper committed internally to migrate the repos and will have a plan we can review and help implement this quarter
 - Brainstorming a plan for increasing test coverage
 - Please contribute to this wiki page: [Test Coverage Plan](#)
 - Blueprint migration update (Sukhdev)
 - What does it mean to be a PTL in Tungsten Fabric
 - What does each PTL cover?
 - Architectural document translation to Chinese language pull request: <https://github.com/tungstenfabric/website/pull/39> (MERGED by Randy Bias)

Minutes

- Sukhdev Kapur will be bringing in a JIRA consultant next week to work with the community around Blueprints, JIRA workflows and sync to the Infra call on Aug 6th.
- SLA discussion
 - Casey: OPNFV has a similar system to TF
 - people aren't committers but are active in the community
 - could borrow that language
 - <https://wiki.opnfv.org/display/DEV/Committer+Promotions>
 - We need to define the role of PTLs before we can dissolve the ARB.
- **Repo move update**
 - bitergia statistics, move to own build pipeline are high priority items blocked on repo migration
 - Carlo is putting a plan together
 - small incremental moves
 - due to very tight dependencies
 - hoping to move a small number of repos each month
 - might take 6-9 months
 - casey: will there be a roadmap?
 - randy: yes, as soon as carlo can put one together
- **Test coverage plan**
 - there are mostly units tests everywhere
 - there's no current way to do individual component tests at the moment
 - manual QA being done by juniper
 - **Please help look at [Test Coverage Plan](#) so we can improve community testing efforts**
 - prabhjot: paul had some AT&T tests
 - sukhdev: there were some concerns from Alex about the tests
 - [2019-07-16 Infra WG Meeting notes](#)
 - **we need to have a TWS meeting with the CI team and AT&T**

- rudra: let me know if I can help
- alex: problems with AT&T PR
 - infra isn't done enough to be stable while adding in new tests
 - OpenStack tests with Tempest and testr/ python
 - different testing methodologies which split design of tests
 - current testing already takes a long time
 - develop time might be better spent tuning those tests instead of just adding more
 - duplication of functionality
- Ed: might be able to run shaker tests weekly?
- alex: are we talking about inclusion for CI? if not we can add optional tests that aren't run at every commit
 - could always run on extra machines outside of normal Vexx Zuul setup
- rudra: shaker is still python based
 - possible to import one tests to the other?
- <https://review.opencontrail.org/q/project:Juniper%252Fcontrail-test+status:open>
- **PR for Chinese language architectural document**
 - Randy just merged it
 - **need a PR for website and docs changes**

Action items

- ☑ Randy Bias Focused call on moving to PTL structure next TSC call on 8/8/2019
- ☑ Randy Bias ping Paul Carver about AT&T tests
- ☑ Daniel Pono Takamori create agenda for TWS meeting including AT&T tests
