2018-10-23 Meeting notes

Attendees

- Paul Carver (AT&T)
- Jaroslaw Lukow

Minutes

- We discussed the migration from Juniper CI infra to LF CI infra
  - Codilime has a step by step plan but we need LF IT support to review and we will need someone in lock step because there is a certain amount of "flash cut" (not the entire process, but parts of it)
  - Paul emailed Casey to check on LF IT support
  - The plan includes a "dry run" portion to debug the code changes that are impacted by the CI induced renaming
- We discussed Ansible jobs for Tempest and Shaker tests and how the "entry point" for creation of new test jobs works.
