2018-10-30 Meeting Notes

Attendees

- Paul Carver
- Zhaoyen Chen

Minutes

- Created https://github.com/tungstenfabric/tf-openlab-ci for Jenkins configuration for the OpenLab. Prior to creation, discussed the whether to use "tf" or "tungsten" in the repo name. Several existing repos have "tungsten" in the name, but we may want to rename those in the future in the interests of "shorter is better".
- Zhaoyen will fork the repo above and begin pushing the lab configuration and testing files as soon as he gets approval from Intel's internal Open Source release process.
