

# 2020 TSC Priorities

This is our 2020 priorities in order of importance. Please see [2019 TSC Priorities](#) for last year's priorities and a rough list of accomplishments in that context.

1. **Attract New Developers (Contributors)**
  - a. Amp up dev outreach: DDFs, meetups, greater China outreach (see below)
    - i. Meetup coordination
  - b. Create and deliver TF Developer Guide v1
    - i. Should work in tandem with the TF Arch Guide
  - c. Localization of TF UI and documentation (stretch goal)
    - i. Simplified Chinese
    - ii. 2nd choice (TBD)
2. **Improve Ease of Use**
  - a. Evaluate our ease of use against another benchmark (Calico?)
  - b. Documentation, content, and website overhaul
  - c. Revisit/revise installation automation (APIs, YAML-based installations, etc.)
  - d. Online help (UI/Analytics)
3. **Increase TF User Adoption**
  - a. Identify lighthouse users of TF (not Contrail)
    - i. Interview for UX feedback, possible user stories
    - ii. Establish user advisory group
  - b. Hone messaging and collateral for ~3 top use cases
  - c. Develop content syndication plan (digital - webinars/virtual conferences, formal speaking, meetups)
  - d. Gain traction in the Kubernetes ecosystem
4. **Improve China Outreach**
  - a. Expanded outreach in China
    - i. Greater media engagement in technical publications
    - ii. Meetups / workshops
  - b. TF Dev Guide v1 in Simplified Chinese (above)
  - c. China-friendly community meeting times (TBD)
5. **Rigorous Build/Release Process**
  - a. Plan for moving to monthly releases
  - b. End all dependency on Juniper
  - c. Greatly increased levels of testing and testing automation, particularly performance and regression testing
