Blueprints

CC wants to use this call to discuss more technical work such as blueprints. The process is under doc review right now. However, it is recommended that we offer a period where a blueprint submitted to a specific location for review. An email at that time should be sent to the tsc mailing list notifying them that a new Blueprint has been submitted. Once that is done, the first TWS meeting will review the proposal. When the TWS agrees that it is a sound proposal that will not negatively impact other aspects of Tungsten Fabric, then the TWS body can "approve" it. There will then be a 2 week comment period on the proposal. The submitter should be actively responding to comments during this period. After the 2 week review, the TSC will then vote on the collected proposal and comments for approval as a new "Project" or "Proposal".

Blueprints should not be used for bugs.

Technical Review

Please review the JIRA and Blueprint workflow patch documentation
