Agenda

- Start the Recording
- Show the Antitrust Policy
- Agenda Bashing, Roll Call, Action Items
- General Topics
  - Converge to single vrouter-kernel-init container image Prabhjot Singh Sethi
  - Documentation of ports used by Tungsten Fabric (critical/debug)
    - identify overlaps as needed
  - Kubernetes network and conformance test
- Any Other Topics
  - Release Planning

Minutes

Single vrouter-kernel-init container image

- Prabhjot Singh Sethi talked about the v-router strategy.

  - Referenced Jira ticket:
    > ⚠ Unable to locate Jira server for this macro. It may be due to Application Link
    >
    > configuration.

- A discussion was had around the build process.
  - Currently building with CentOS and Ubuntu with no issues.
  - Concerns were raised about not using DKMS.
    - The image is being built with kernel headers. Prabhjot Singh Sethisays that the full DKMS is not needed.
  - Prabhjot Singh Sethi wants to simplify the build process as much as possible and expand the level of kernel version support.
  - Prabhjot Singh Sethi will continue the conversation via the mailing list.

Documentation of ports used by TF

- Need to identify overlaps
- There is no documentation currently identifying the ports.
  - Not all appear to be using common ports.
  - Yuvaraja Mariappan and Prabhjot Singh Sethi will sync over email to identify the ports and develop documentation.

Kubernetes network and conformance test

- Prabhjot Singh Sethi wants to add conformance testing to the CI for Kubernetes.
  - Linked to: https://github.com/kubernetes/kubernetes.git
    - make WHAT=test/e2e/e2e.test
- There is a larger discussion about CI that may need to happen based on other ongoing conversations around community infrastructure.

Release Planning

- Marek Chwal we are working to define the milestones. Need community feedback on [Template] Release Scope Overview page.
  - Do we have the list of blueprints proposals for the next release?
    - Prabhjot Singh Sethi Looking to align some of the projects first
    - Sukhdev Kapur stated that Daniel Pono Takamori and Jared Linley are currently working out the details for importing the Jira data.
  - Need rapid spin up on the Jira tracking so we can help manage the release because the progress is not currently clear.
    - Prabhjot Singh Sethi working as part of the initial process we can start moving tickets manually to the community jira.
  - Marek Chwal what do we currently have in the TF Blueprints?
    - Not much from Juniper yet. But those should be coming soon.
    - Can we clean up the TF Blueprints in the community jira?
      - Anything more than 6m old should be moved to the backlog. Anyone can move the bugs back to activity if they are still active.
      - Any bugs that are less than 6m we should reach out to the assignee/reporter.

Action items

- [x] Stephen Mooreto follow up with Nagendra Prasath Maynattamai Prem Chandranon action items. 11 Aug 2020
- [x] PTLs need to update project descriptions.
