

# 2019-09-25 Docs Project Meeting

## Date

25 Sept 2019

## Attendees

- VM (Vicky) Brasseur (she/her)
- Will Stevens
- Daniel Pono Takamori
- Darien Hirotsu

## Agenda

- Review action items from [2019-09-18 Docs Project Meeting](#)
- Pending Gerrit reviews
  - <https://gerrit.tungsten.io/r/q/project:docs-is:merged>
- RTD update
- tf-devstack documentation (related to contrib docs)
- Coming soon...? List of all services & the ports they use.
- DDF
- Rescheduling the Docs call
  - <https://doodle.com/poll/rxufi9x24dpb8u2n>

## Minutes

- Action items
  - VMB: done
  - Darien: done, should have patch submitted by EOW-ish
- Gerrit reviews
  - Much talk about process
  - Right now requires a +2 code review, +1 verify
  - Need to look at [review.opencontrail.org](http://review.opencontrail.org) to see previous process, then use that for now (may require change)
- RTD update
  - Emailed Pragmatic about Zuul jobs for RTD
    - Set up CI to automagically build and publish docs as they're merged
  - Complication: Working on standardisation for new RTD3 API
    - Not sure whether we'll need this yet
    - Probably just
  - When a patch is merged...?
    - Can RTD show a diff?
    - It'll build somewhere that we can confirm (Verify check) as a staging before it goes live
- tf-devstack documentation
  - tf-devstack docs need a lot of work
    - Few docs, specific to AWS
    - Devs will want to use their laptops
  - swill is trying to make it work with VirtualBox and hitting problems
    - And it's entirely undocumented
    - Reverse-engineering and documenting as he goes along
    - Once he has something working, he'll update the tf-devstack docs, link in the Contributor guide
- Challenge: Commit process for patches against r.o.o.d.d.d?
  - Requires tickets, but can't create a ticket against the Juniper Jira...to which we don't have access
- DDF
  - Attending for sure: VMB, swill
  - Maybe: Pono, Darien
  - Topic idea: Contributor guide hackathon; general +1
- Reschedule docs call
  - Please do the doodle by Monday

## Action items

- ✓ Daniel Pono Takamori Will have a look at r.o.o.d.d.d and do something with the Gerrit process
- ✓ VM (Vicky) Brasseur (she/her) Ping Sofia about RTD & multiple repos
- ✓ VM (Vicky) Brasseur (she/her) Ask Prabhjot Singh Sethi what kind of ticket he's attaching to his [review.opencontrail.org](http://review.opencontrail.org) patches to get past the gate. Answer: He just opens a TF Jira ticket and it's never validated but goes through just fine.

- Daniel Pono Takamori to change the "Issue-ID" to be case insensitive in the commit message to simplify the gating rules.
- VM (Vicky) Brasseur (she/her) Add contributor guide hackathon to DDF wiki
