## Agenda

- Start the Recording
- We will start by mentioning the project's Antitrust Policy, which you can find linked from the LF and project websites. The policy is important where multiple companies, including potential industry competitors, are participating in meetings. Please review and if you have any questions, please contact your company legal counsel. Members of the LF may contact Andrew Updegrave at the firm Gesmer Updegrave LLP, which provides legal counsel to the LF.

## Minutes

### TSC Election

- Election results will be posted today for the TSC Election.
- Tomorrow we will be initiating the TSC Chairperson election

### Info.yaml

- 19 of the 24 repos have been merged. Please make sure that your info.yaml files are appropriately merged.

### RelEng / Infra Updates

- Currently, the costs of the CI have rapidly ballooned beyond our budget. We urgently need to investigate the jobs that are running and remove anything unnecessary.
  - Also, to ensure that the LF has more visibility we will be migrating the Jenkins services to the LF
  - We will also be looking at adding a S3 target and Packer images
- We will also be sending out a form requesting mapping of the current Username/Email that you are using to commit and what your LF ID/Email is so that we can manually merge these on the new platform and ensure that your code contributions.
  - The timeline to complete this form will be 2 weeks.
  - Once the migration to LF Single Sign-On Auth0, all legacy accounts will be disabled and contributors will only be able to contribute with their LF ID.
- Additional discussion ensued around the CI Infra
  - Explicit concerns were raised about the length of and the number of tests that are running.

### TF Release Update

- we are waiting for L1 to be provided - plan is to have it within 10 days. Based on that TF will officially issue our release
- We also need to start planning our next release. PTLs are asked for providing Jira tickets and blueprints for the next release [R21.12 Release Overview](#)
