

# Announcing the 2021 Tungsten Fabric TSC - DRAFT

As of April 8th 2021, Tungsten Fabric community is proud to announce its new Technical Steering Committee (TSC)! The 2021 TSC includes a number of new and familiar names. Here is the team that shall be driving the progress of the project for the upcoming year.

## Technical Committee:

Marek Chwal - CodiLime

Marek is a project manager at CodiLime. He was nominated as Tungsten Fabric's release manager in [June of 2020](#). Marek is a key contributor in defining Tungsten Fabric's release strategy and shall continue make open Tungsten Fabric's release an open an inviting process.

Sukhdev Kapur - Juniper Networks

Sukhdev is a distinguished engineer at Juniper Networks who has been a TSC member since the project's acceptance into The Linux Foundation Networking. He spends a significant amount of time with adjacent communities like the Akraio and CNTT.

Szymon Krasuski - CodiLime

Szymon is a software engineer at CodiLime. He is a significant contributor to the TF Operator framework. As evident by this [awesome post](#), Szymon will be a pivotal contributor to making Tungsten Fabric more consumable for new developers.

**Community Committee:**

Nick Davey - Juniper Networks

Nick is currently a product line manager in the Contrail Business Unit at Juniper Networks. Using his professional experience in networking, Nick shall continue to develop the Tungsten Fabric community by helping customer's adopt TF for their private clouds.

Szymon V. Gobiewski - CodeLime

Szymon is a project manager at CodiLime. He is the current Tungsten Fabric documentation project lead. Szymon shall continue to drive Tungsten Fabric's transparency by leveraging his extensive experience working with both Tungsten Fabric and commercial Contrail.

Ian Rae - CloudOps

Ian is the CEO of CloudOps and was one of the original members of the TSC when Tungsten Fabric was accepted into The Linux Foundation. Ian brings several years of experience in open source communities which shall be pivotal to continue driving TF's open source strategy.

Special thanks to all of those who participated in this year's TSC election! We look forward to continuing the support for the 2021 TSC at making Tungsten Fabric an awesome option for multi-cloud networking.
