11/27/2018

Attendees

- Paul Carver (AT&T)
- Henry Fowler (AT&T)
- Prabhjot Singh Sethi (ATS)
- Joseph Gasparakis (Intel)
- Casey Cain (LF)
- Thanh Ha (LF)
- Eyal Lavee (Mellanox)
- Jan Gutter (Netronome)
- Frikkie Scholtz (Netronome)
- Pieter Jansen van Vuuren (Netronome)
- Simon Horman (Netronome)
- Valentin Sinitsyn (Yandex)
- Marc Rapoport (Juniper)
- Sukhdev Kapur (Juniper)

Agenda

- Release schedule for 5.0.2, 5.1 and 5.2
- TSC Elections
- Issues with contrail_vrouter VIF in Nova (Jan)
- Kubecon Seattle plans
- https://blueprints.launchpad.net/opencontrail/+spec/pluggable-offloads got approved last week but is not yet marked for inclusion in 5. (https://blueprints.launchpad.net/opencontrail/r5.1) (Frikie)

Minutes

- Release schedules:
    - 5.0.2 was released last week
    - 5.1 Planned for mid December
    - Next release will be 5.1.1 (Q1 2019) and then version 6 (Q2 '19)
    - Both offload approaches will be merged in trunk to make sure quality is there
- Discussion of DPDK version. 18.05? 18.11?
    - Mellanox has done all their offloads testing with 18.05
    - 18.11 was just released yesterday
    - Usually the .11 releases of DPDK are the long term releases
    - The amount of testing done on 18.05 is a good argument for using it for TF rather than jumping to 18.11 right now.
    - AI: Sukhdev to check internally what the recommendation is moving to 18.05 vs 18.11
    - AI: Eyal to do the same
- Election mechanics
    - LF will pull ATCs from Juniper Gerrit (because no data has been migrated to LF Gerrit yet) and from GitHub for repos which are not in Gerrit
    - Election mechanics wiki page is revised to version 11 and resubmitted for approval. Email sent to TSC mailing list with diff URL and link to voting buttons.
- Discuss in the next call about having a release manager and the checklist they need to go through for every release
- AI: Joseph to contact Ed and see who the person did that before and tag now
