1/22/2019

Attendees

Jan Gutter (Netronome)

Frikkie Scholtz (Netronome)

Pieter Janse van Vuuren (Netronome)

Joseph Gasparakis (Intel)

Prabhjot Singh Sethi (ATS)

VMB (Juniper)

Edward Ting (Lenovo)

Agenda

- · Release updates and schedule for the upcoming ones
 - When will 5.1 be released? Still end of Feb 2019?
 - When will 5.1.1 be released?
 - What SmartNIC offload features are included in 5.1?
- SmartNIC full offload
 - +1 from Jeva
 - o from Joseph with the view of "if both datapaths are tested and the one doesn't break the other I will convert this to +1"
 - What is the next step?
- Ed Ting (Lenovo) to give an update on a usecase and the release criteria for TF
- Any updates/discussions related to Jira?
- http://148.251.5.90/tpc/ version control?
- TF doc project group role moving forward?
- · Action items from last week:
 - O Phil Robb (PR): Will connect with Casey to take over some of his tasks while he's ill
 - PR: Will work w/LF folks to gather the ATC list
 - $^{\circ}~$ Randy Bias (RB): Will check with Codilime about transition of the TF build stuff
 - O PR: Will get LF marketing to coordinate w/VMB & RB to get correct dates for the release stuff for the website
 - o RB: Will contact Codilime about the Launchpad-Jira transition

Minutes

- · Release updates
 - No known updates to 5.1/5.1.1 schedule
- SmartNIC offload features included in 5.1?
 - $^{\circ}\,$ Have partial & have full so far, merged in master branch but not targeted for 5.1
 - No word on this; need to hear from Juniper devs
- SmartNIC full offload
 - o JG: 0 because want to test both full & partial offloads before accepting this
 - o Frikkie (FS): Jeya could commit all the code for testing
 - Partial is already merged
 - Merged in master, not in 5.1
 - Full isn't merged yet this is the question here
 - There doesn't appear to be any way to tell what's already on the 5.1 branch
 - VMB: Suggests someone has a look at the Jira to see whether that information is in there
 - http://jira.tungsten.io
- Use case & release criteria for TF
 - Lots of discussion, no minutes (oops)
 - VMB suggested separate sub-committee for creating a separate release train from Juniper
 - Make sure Juniper people are on it
 - Paul will email a motion to create a new working group for the release train (thanks, Paul!)
- Jira: VMB said no need to login to see the TF Jira items (thanks to Thanh's work)
 - Need doc PRs reviewed/merged: https://github.com/tungstenfabric/docs/pulls
 - Also needs review: https://github.com/tungstenfabric/website/pulls
- Deferring last 2 agenda items for next week (out of time)

Action items

- VMB to bring someone from Juniper to discuss what's in the 5.1 branch (specifically: offloads, but also just in general) DONE (email is out)
 VMB: Will review new contributor docs & try to get them all into one spot, at the very least
